

PRODUCT OVERVIEW

XCELSIUS WEB INTELLIGENCE INTEGRATION SUITE

- Access information from your extensive Web Intelligence library
- Deliver drill capabilities from your Universe layer directly to your dashboard
- Build data connections direct to your reports
- Add live discussions to your dashboards to help your users collaborate

The Xcelsius™ Web Intelligence Integration Suite from Antivia gives you the ability to easily integrate information from Web Intelligence directly within your Xcelsius Dashboards. It is seamlessly integrated with your BusinessObjects™ Web Intelligence™ environment and allows you to quickly and effortlessly access the wealth of information from your library of Web Intelligence reports.

Deliver Web Intelligence Information Directly Within Your Dashboards

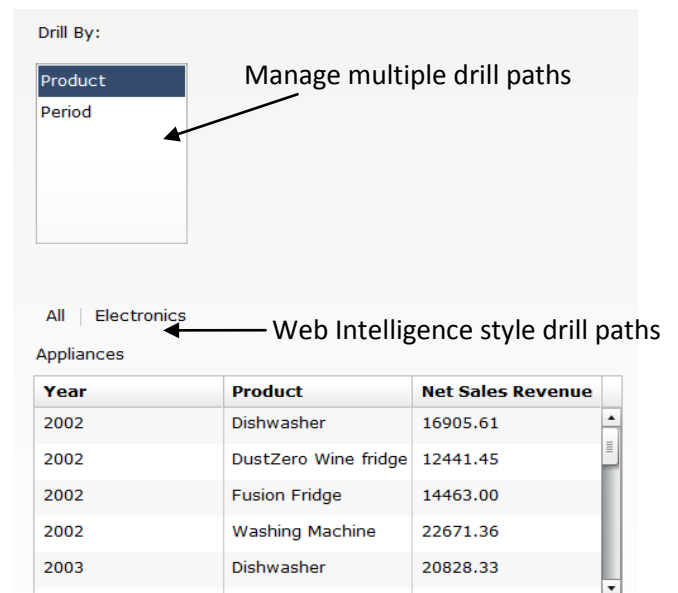

Don't reinvent the wheel! Easily add Web Intelligence information into your dashboards by adding custom components from the Integration Suite.

Add Drillable Web Intelligence Information For Your Dashboard Users

As well as easily accessing any Web Intelligence content within your BusinessObjects environment the Integration Suite enables you to deliver drillable data grids that work directly with your Universe drill paths.

Bind Your Web Intelligence Data Directly With All Other Xcelsius Components

All data delivered from all the components within the Integration Suite have the ability to bind data to other Xcelsius components. Easily pass information from Web Intelligence to charts or maps and in turn use them to drive how the user can drill through data.

The screenshot shows a 'Drill By:' section with a list containing 'Product' and 'Period'. An arrow points to this list with the text 'Manage multiple drill paths'. Below this is a breadcrumb-style path: 'All | Electronics', with an arrow pointing to it and the text 'Web Intelligence style drill paths'. At the bottom is a table titled 'Appliances' with columns for Year, Product, and Net Sales Revenue.

Year	Product	Net Sales Revenue
2002	Dishwasher	16905.61
2002	DustZero Wine fridge	12441.45
2002	Fusion Fridge	14463.00
2002	Washing Machine	22671.36
2003	Dishwasher	20828.33

Empower Your Users With The Slice & Dice Panel

The Xcelsius Web Intelligence Integration Suite also enables you to empower your dashboard users with innovative interactive components that allow them to decide how much information they wish to view and in which format.

With the Slice & Dice Panel you can give information to your users in a format that they can choose. Fully interactive, it allows them to decide from a cross-tab or tabular view both of which are fully drillable on any of the dimensions they pick.

Mark Hudson Tue, 21 Oct 17:23
As you can see we seem to be getting a lot of traction via our website and also a lot of ongoing sales. Is this having an affect on our traditional sales channels? Thoughts please!

Dawn Simpson Tue, 21 Oct 17:31
Hi Mark, you right we have had a huge increase in traffic & sales via our eStore site since the start of the year. We have invested wisely with Google Adwords and have sponsored some online gaming and sports sites which are giving us great click through sales. The great news is as you can see from the Sales Channel Information that we are not diluting our other channels.

Clare Coole Tue, 21 Oct 17:33
Hi all, completely agree with both of you. The sales channel data clearly shows that we have exceeded target in all our other channels along with Internet. What is interesting is that we believe we have now managed to attract a completely new set of demographics purchasing from us. Our traditional channel is between 25 - 55 where as our Internet business is attract new clients in the 15 - 25 age bracket. Excellent results.

Add Live Collaboration To Your Xcelsius Dashboards

Connect your dashboard users together with Instant Messenger™ like discussions. Discussions are always live and are independent of how your dashboard is delivered. Send a dashboard to InfoView™ and embed the same dashboard in a PowerPoint

presentation. Your users remain connected and are able to collaborate around the information delivered on both dashboards.

System Requirements

The Xcelsius Web Intelligence Integration Suite supports the following environments:

- Xcelsius 2008
- BusinessObjects Enterprise & Web Intelligence XI
- BusinessObjects Enterprise & Web Intelligence XI R2
- BusinessObjects Enterprise & Web Intelligence XI 3.0 & 3.1
